

# Integrated Filtration System For Koi Pond

- A holistic approach to water treatment with integrated multiple filtration components, including mechanical, biological, and UV filtration stages
- Efficiently remove debris, waste, and harmful substances from the water
- Smaller footprint compared to separate standalone filters
- Pre-assembled or direct installation instructions, easy to set up the filtration system

Model	Treatment Capacity (m <sup>3</sup> /h)	Product Size (mm)	Inlet/Outlet Size (mm)	Rated Power (Watts)
EIFS-10	10	1255*840*1000	110	2600
EIFS-20	20	15400*1000*1000	110	3700
