

# Incubator

Demersal eggs Incubator

Pelagic eggs Incubator

Adhesive eggs Incubator

- A independent temperature control system to maintain optimal temperatures for the eggs' incubation and an adjustable water flow to simulate natural conditions and oxygenate the fish eggs
- Provide a controlled and secure environment that protects the eggs from external threats, ensuring higher survival rates
- Significantly enhance the hatching success rate of fish eggs, higher yield and productivity in fish hatcheries

Product	Model	Product Size (mm)
Demersal eggs Incubator	EDI-001	2350*820*1200
Adhesive eggs Incubator	EAI-001	2180*820*730
Pelagic eggs Incubator	EAI-001	Ø 1000*1100

\* Different incubators for different egg characteristics
